

### INTENT:

**“The study of geography is about more than just memorising places on a map, it’s about understanding the complexity of our world, appreciating the diversity of our cultures that exists across continents, and in the end, it’s about using all that knowledge to help bridge divides and brings people together”**

**Barack Obama**

Geography, as a discipline, helps us to make sense of the world around us. It is hands on, it is relevant, and it is fun.

Geography will create more well-rounded and worldly people as it will give insight to current issues in both human and physical geography which affect us all. In an inter-connected world like we have today, the study of geography has never been more important. Without question, geography covers many pressing issues and will inspire students to want to tackle these issues from the offset. By studying geography, students will gain a curiosity about the world; offering such a variety of topics and experiences that are never ‘old’ or ‘boring’ but ever changing and pertinent.

Sharing our passion for the subject, helps to inspire students to apply a wide range of geographical investigative skills and approaches to enable them to become globally and environmentally informed, thoughtful enquiring citizens.

### Half term points

#### AUTUMN 1

##### Our local world

#### Learning to include:

- Applying core knowledge about urban change
- analysis of key geographical skills question stems
- use geographical evidence
- interpret (maps/graphs)
- in depth place study (Stoke on Trent)
- multiplier effects
- SEE impact analysis

#### AUTUMN 2

##### Amazing places: A risky world

#### Learning to include:

- Applying core knowledge about tectonic and weather hazards
- analysis of key geographical skills question stems
- use geographical evidence
- interpret (maps and graphs)
- compare and contrast natural hazards
- SEE impact analysis
- Analysis of cause, effect and solution

#### SPRING 1

##### Enquiry focus: Boneo

#### Learning to include:

- Applying core knowledge about ecosystem change
- analysis of key geographical skills question stems
- use geographical evidence
- interpret (maps and graphs)
- collect primary and secondary data
- present data accurately
- SEE impact analysis analysis of cause, effect and solution

#### SPRING 2

##### Amazing places: mega cities

#### Learning to include:

- Applying core knowledge about urbanisation
- analysis of key geographical skills question stems
- use geographical evidence
- interpret (maps and graphs)
- compare and contrast developed/developing cities
- SEE impact analysis
- analysis of cause, effect and solution

#### SUMMER 1

##### A journey into Africa

#### Learning to include:

- applying core knowledge about development
- analysis of key geographical skills question stems
- use geographical evidence
- interpret (maps and graphs)
- compare and contrast development data/indicators
- SEE impact analysis analysis of cause, effect and solution

#### SUMMER 2

##### A journey into Africa

#### Learning to include:

- Applying core knowledge about impacts of development
- analysis of key geographical skills question stems
- use geographical evidence
- interpret (maps and graphs)
- compare and contrast development data/indicators
- SEE impact analysis
- analysis of cause, effect and solution
